- [Portfolio](#)
- Vienna, Austria

## Technical Skills

### Programming Languages

Python, PHP, JavaScript, SQL

### Backend

FastAPI, Django, Laravel, RESTful  
APIs, OpenAPI

### Frontend

HTML5, CSS3, JavaScript,  
Bootstrap, jQuery, React

### Databases

MySQL, MongoDB

### DevOps & Cloud

Docker, Kubernetes (Fundamentals),  
Git, GitHub Actions (CI/CD), Linux,  
Google Cloud Platform (GCP)

### Software Engineering

Object-Oriented Programming  
(OOP), Design Patterns, MVC  
Architecture, Agile/Scrum

### Core Competencies

Backend Development, System  
Design, Database Design, API  
Development, Workflow  
Automation, Requirements  
Analysis

## Education

### MSc Computer Science

University of Vienna  
2024 – Expected 2027

### BSc Computer Science

Herat University  
2012 - 2015

## Languages

**Persian:** Native  
**English:** C1  
**German:** A2

## Professional Summary

Backend Software Engineer with **7+ years of professional experience** developing scalable backend systems, microservices, REST APIs, and full-stack web applications using **Python (FastAPI, Django), React, MySQL, MongoDB, and Docker**. Passionate about designing clean architectures, distributed systems, and building reliable software.

## Experience

### Software Engineer

Norwegian Refugee Council (NRC) - Kabul, Afghanistan Aug 2022 – Dec 2023

- Developed a **Django/MySQL** web application to monitor project progress across multiple humanitarian projects within the NRC.
- Designed **Python-based ETL pipelines**, SQL queries, and database structures to consolidate and validate data from different sources.
- Automated** data validation and reporting workflows, improving the quality and consistency of data covering approximately **500,000 beneficiaries**.

**Technologies:** Python, Django, SQL, JavaScript, Bootstrap, jQuery, KoboToolbox

### Software Engineer

OXFAM International NGOs - Kabul, Afghanistan Jan 2020 - Jul 2022

- Co-developed a **Django/MySQL-based** CFRM web application supporting **10–15** concurrent humanitarian projects.
- Led requirements analysis, database design, workflow design, and backend implementation.
- Developed **Python ETL pipelines and role-based workflows** to centralize beneficiary feedback and streamline complaint management.
- Contributed to improving beneficiary satisfaction with CFRM system from **3.7/5 to 4.4/5** by enhancing complaint tracking and follow-up processes.

**Technologies:** Python, Django, SQL, Git, JavaScript, Bootstrap, jQuery, KoboToolbox

### Software Developer

ClikGlobal (Remote – USA) Oct 2018 – Oct 2019  
(in partnership with PomTech, Afghanistan)

- Developed **Laravel-based** applications and business websites for U.S. clients, implementing **backend modules, RESTful APIs, and MySQL** databases.
- Built responsive web interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Worked in a **10+ developer** distributed team, following Git-based workflows, code reviews, Agile practices, testing, and technical documentation.

**Technologies:** PHP, Laravel, MySQL, Git | HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax

### Software Developer

Alfa Plus Inc - Kabul, Afghanistan Mar 2016 – Sep 2018

- Developed a University Management System with **Laravel**, supporting student enrolment, course registration, grading, and payment management.
- Built responsive web interfaces using HTML, CSS, Bootstrap, and JavaScript.
- Collaborated with the **development team** to implement new features, maintain existing modules, and improve application reliability.

**Technologies:** PHP, Laravel, MySQL, HTML, CSS, JavaScript, Bootstrap, jQuery, Git

## Featured Project

### FactCheck – Customizable Comparison Logic Framework

[Live Demo & Technical Details](#)

- Designed and developed a **Domain-Specific Language (DSL)** for customizable fact comparison using predefined functions and operators.
- Implemented an **Abstract Syntax Tree (AST)-based validation pipeline** with syntax, semantic, and safety validation.
- Built a secure **AST-based execution engine** supporting explainable results and confidence scoring without using **eval()**.
- Developed a full-stack application with **FastAPI, React, MongoDB, and Docker**, supporting formula versioning and execution history.

**Technologies:** Python, FastAPI, REST API, React, MongoDB, Docker, Git
